Gen AI Academy

APAC Edition

Build in APAC. Build for the world.

Participant Details

a. Participant Name:
b. Problem Statement:

Brief about the idea

Type here...

Your solution should be able to explain the following:

- How did you approach the common problem statement and translate it into a working solution using ADK, MCP/AlloyDB AI while ensuring Hackathon's core requirements are met?
- What real-world problem does your solution address, and what practical impact does it create for users?
- What is the core approach or workflow behind your solution?

Type here...

Opportunities

- How different is it from any of the other existing ideas?
- USP of the proposed solution

Type here...

List of features offered by the solution

Type here...

Process flow diagram or Use-case diagram

Type here...

Wireframes/Mock diagrams of the proposed solution

Type here...

Architecture diagram of the proposed solution:

Type here...

Technologies/Google Services used in the solution

(Why did you choose your specific AI stack and system design, and how does it support scalability and real-world deployment?)

Type here...

Snapshots of the prototype
